NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
For the Six Months Ended June 30, 2014 and 2013
(All tabular amounts are expressed in thousands of Canadian dollars unless otherwise noted)
(Unaudited)

NOTE 1 – CORPORATE INFORMATION

Dejour Energy Inc. (the “Company”) is a public company trading on the New York Stock Exchange AMEX (“NYSE-AMEX”) and the Toronto Stock Exchange (“TSX”), under the symbol “DEJ.” The Company is in the business of exploring and developing energy projects with a focus on oil and gas in North America. On March 9, 2011, the Company changed its name from Dejour Enterprises Ltd. to Dejour Energy Inc. The address of its registered office is 598 – 999 Canada Place, Vancouver, British Columbia.

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Dejour Energy (USA) Corp. (“Dejour USA”), incorporated in Nevada, Dejour Energy (Alberta) Ltd. (“DEAL”), incorporated in Alberta, Wild Horse Energy Ltd. (“Wild Horse”), incorporated in Alberta, and 0855524 B.C. Ltd., incorporated in British Columbia. All intercompany transactions are eliminated upon consolidation.

The interim condensed consolidated financial statements are presented in Canadian dollars, which is also the functional currency of the parent company. These interim condensed consolidated financial statements were authorized and approved for issuance by the Audit Committee on August 7, 2014.

NOTE 2 – BASIS OF PRESENTATION

(a) Basis of presentation

These condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial reporting (“IAS 34”) using accounting policies consistent with IFRS as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These interim results do not include all the information required for the full annual financial statements, and should be read in conjunction with the consolidated financial statements of the Company for the year ended December 31, 2013.

(b) Basis of measurement

The interim condensed consolidated financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and liabilities to fair value as explained in the accounting policies in this note to the Company’s annual consolidated financial statements.

(c) Use of estimates and judgments

The preparation of interim condensed consolidated financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4 to the Company’s annual consolidated financial statements.

(d) Functional and presentation currency

Subsidiaries measure items using the currency of the primary economic environment in which the entity operates with entities having a functional currency different from the parent company, translated into Canadian dollars.

NOTE 3 – CHANGE IN ACCOUNTING POLICIES

The Company has adopted the following new and revised standards, along with all consequential amendments, effective January 1, 2014. These changes are made in accordance with the applicable transitional provisions.

IAS 36, Impairment of Assets was amended in May 2013. This standard reduces the circumstances in which the recoverable amount of CGUs is required to be disclosed and clarifies the disclosures required when an impairment loss has been recognized or reversed in the period. The adoption of the standard did not have an impact on the Company's condensed consolidated financial statements.

In May 2013, the IASB issued IFRIC 21 "Levies," which was developed by the IFRS Interpretations Committee ("IFRIC"). IFRIC 21 clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. The interpretation also clarifies that no liability should be recognized before the specified minimum threshold to trigger that levy is reached. IFRIC 21 is required to be adopted retrospectively for fiscal years beginning January 1, 2014, with earlier adoption permitted. IFRIC 21 will be applied by the Company on January 1, 2014 and the adoption may have an impact on the Company's accounting for production and similar taxes, which do not meet the definition of an income tax in IAS 12 "Income Taxes." The adoption of the standard will not have an impact on the Company's condensed consolidated financial statements.

The amendments to IAS 32 "Financial Instruments: Presentation" clarify the current requirements for offsetting financial instruments. The amendments to IFRS 7 "Financial Instruments: Disclosures" develop common disclosure requirements for financial assets and financial liabilities that are offset in the financial statements, or that are subject to enforceable master netting arrangements or similar agreements. The Company retrospectively adopted the amendments to both standards on January 1, 2013. The application of these amendments does not have any impact on the Company's condensed consolidated financial statements.

NOTE 4 - CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in profit or loss in the period of the change, if the change affects that period only; or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the consolidated annual financial statements within the next financial year are described in the Company's annual consolidated financial statements.

Exploration and evaluation (“E&E”) assets consist of the Company’s exploration projects which are pending the determination of proved reserves.

During the six months ended June 30, 2014, the Company sold its working interests in certain oil and gas leases in the areas of Colorado to unrelated third parties for gross proceeds of \$412,000 (US\$386,000).

During the six months ended June 30, 2014, the Company capitalized \$48,000 (June 30, 2013 – \$50,000) of general and administrative costs related to its US oil and gas interests.

The Company determined that there were no indicators of impairment for its Canadian oil and gas interests or no indicators of impairment reversal for its Canadian and U.S. oil and gas interests at June 30, 2014.

On June 30, 2014, the Company closed the sale of 65% of its working interest in the initial four wells drilled in 2013 at its Kokopelli project in Colorado, together with certain related production facilities, for \$4,136,000 (US\$3,876,000) cash and a 25% carried working interest in a US\$16.0 million drilling and completion program planned for 2014 to be funded 100% by the Purchaser of the assets. The Company assigned a value of \$4,377,000 (US\$4,099,000) to the value of the carried interest based on the price paid by the Purchaser for the undrilled petroleum and natural gas rights at Kokopelli. The sales transaction resulted in gross proceeds on disposition of \$8,513,000 and a gain on sale of assets \$6,822,000 (US\$6,394,000) for the period. The sales transaction resulted in the de-recognition of certain oil and gas assets, along with an adjustment to the financial contract liability. The net gain on this transaction was \$1.9 million.

In March 2014, the Company closed the purchase of certain natural gas producing assets and related processing facilities adjacent to its existing Woodrush oilfield at Ft. St. John, British Columbia, resulting in the acquisition of an additional 9,600 net acres (44% developed). The assets acquired included a 54% working interest in a Halfway formation well, a 74% working interest in 2 shut-in natural gas wells, and a 96.8% working interest in a Sour Processing Facility. Funding for the purchase was provided by cash on hand and available credit from DEAL's current credit facility with its Canadian bank. The properties so acquired have a fair value of \$2,146,000, applying a 10% discount factor to expected future net cash flows. The Company also assumed related decommissioning liabilities of \$1,520,000, applying a weighted average discount rate of 2.04% and an inflation rate of 2%. The total cash consideration paid is \$626,000.

During the six months ended June 30, 2014, the Company capitalized \$31,000 (June 30, 2013 – \$3,000) of general and administrative costs related to its Canadian oil and gas interests. During the six months ended June 30, 2014, the Company capitalized \$181,000 (June 30, 2013 – \$171,000) of general and administrative costs related to its US oil and gas interests.

The Company determined that there were no indicators of impairment or impairment reversal at June 30, 2014.

NOTE 8 – BANK LINE OF CREDIT

On June 5, 2014 and amended on June 27, 2014, DEAL renewed its Credit Facility with the Bank for a maximum amount of \$2.9 million. Effective July 1, 2014, the Credit Facility reduces by \$100,000 per month. Interest on the loan is Prime + 3% payable monthly and the amount outstanding is payable on demand any time. Collateral for the Credit Facility is provided by a \$10.0 million first floating charge over all the assets of DEAL, a general assignment of DEAL's book debts and a \$10.0 million debenture with a first floating charge over all the assets of the Company. Additionally, an amount of US\$385,000 was deposited in the Company's US\$ account with the Bank at June 30, 2014 upon the Bank's request to be applied to DEAL's general operations.

Under the terms of the Credit Facility, DEAL is required to maintain a working capital ratio of greater than 1:1 at all times. The working capital ratio is defined as the ratio of (i) current assets (including any undrawn and authorized availability under the Credit Facilities) less unrealized hedging gains to (ii) current liabilities (excluding the current portion of outstanding balances of the facility) less unrealized hedging losses. As at June 30, 2014, DEAL was in compliance with its working capital ratio requirement.

On July 29, 2014, the Company renewed the Credit Facility with its Bank for a maximum of \$2.8 million, reducing \$100,000 per month through November 1, 2014, the next review date. As part of the renewal, the Company can utilize the US\$385,000 on deposit with its Bank at June 30, 2014 on the operations and capital programs of DEAL at the Company's discretion.

NOTE 9 – WARRANT LIABILITY

Warrants that have their exercise prices denominated in currencies other than the Company's functional currency of Canadian dollars, other than agents' warrants, are accounted for as derivative financial liabilities. These warrants are recorded at the fair value at each reporting date with the change in fair value for the period recorded in profit or loss for the period.

NOTE 10 – LOAN FACILITY

On June 30, 2014, the Company paid \$3,563,000 to settle its outstanding loan facility of \$3.5 million plus accrued interest of \$63,000 to the Lender, resulting in a loss on debt settlement of \$388,000. With the payment, all outstanding debt obligations are extinguished and the Lender has released and discharged the collateral security taken in respect of the loan facility.

An embedded derivative liability in the amount of \$583,000 related to 7,291,667 incentive share purchase warrants attached to the original \$3.5 million loan facility remains outstanding at June 30, 2014.

The derivative liability is carried at fair value through profit and loss and the instrument is re-measured at each reporting date using an option pricing model. For the six months ended June 30, 2014, the Company recorded an unrealized loss on the derivative liability of \$296,000 (six months ended June 30, 2013 - \$Nil). NOTE 12 – FINANCIAL CONTRACT LIABILITY

On December 31, 2012, Dejour USA entered into a financial contract with a U.S. oil and gas drilling fund (“Drilling Fund”) to fund the drilling of up to three wells and the completion of up to four wells in the State of Colorado. The Drilling Fund contributed US\$6.5 million cash to earn working interests in production from the wellbores ranging from 55.56% to 77.78% before payout and 44.44% to 58.33% after payout. This amount was subsequently increased by US\$500,000 to US\$7,000,000 with the Company’s consent.

The December 31, 2012 financial contract states the Drilling Fund has the right to require Dejour USA to purchase its working interests in the wellbores for cash in September 2016, 36-months after the final well in the 4-well program is placed on production. The repurchase price is based on a predetermined formula which ensures the Drilling Fund earns a minimum return, compounded annually and applied on a monthly basis, on 75% of its original US\$7,000,000 investment over the 36-month period. Accordingly, the Company considered the transaction to be a financial contract as the risks and rewards of ownership were not substantially transferred to the Drilling Fund and, on December 31, 2012, the Company recorded the transaction in its accounts by increasing property and equipment and financial contract liability by US\$6,500,000 on its balance sheet. This amount was subsequently increased to US\$7,000,000.

On June 30, 2014, the financial contract was amended and the Drilling Fund agreed to retain its working interest in the wells as at September 30, 2016, should it exercise its right to require Dejour USA to pay the minimum return provided for in the December 31, 2012 contract. The Drilling Fund further agreed to deduct the residual reserve value of its working interest in the 4 wellbores at September 30, 2016 in determining the net liability owed by Dejour USA to the Drilling Fund at September 30, 2016. The parties also agreed to have a third party engineering firm calculate the residual value of the reserves in according with industry-accepted valuation standards.

The June 30, 2014 amendment transferred the risks of ownership of the 4 wellbores back to the Drilling Fund and the financial contract liability was adjusted to reflect the present value of the amount owing to the Drilling Fund under the financial contract at September, 2016 (\$4,568,000), net of the present value of the residual reserve values (\$1,328,000), or \$3,240,000, as follows:

NOTE 14 – STOCK OPTIONS AND SHARE PURCHASE WARRANTS

(a) Stock Options

The Stock Option Plan (the “Plan”) is a 10% “rolling” plan pursuant to which the number of common shares reserved for issuance is 10% of the Company’s issued and outstanding common shares as constituted on the date of any grant of options.

The Plan provides for the grant of options to purchase common shares to eligible directors, senior officers, employees and consultants of the Company (“Participants”). The exercise periods and vesting periods of options granted under the Plan are to be determined by the Company with approval from the Board of Directors. The expiration of any option will be accelerated if the participant’s employment or other relationship with the Company terminates. The exercise price of an option is to be set by the Company at the time of grant but shall not be lower than the market price (as defined in the Plan) at the time of grant.

The following table summarizes information about outstanding stock option transactions:

	Number of options	Weighted average exercise price \$

NOTE 14 – STOCK OPTIONS AND SHARE PURCHASE WARRANTS (continued)

(a) Stock Options (continued)

The fair value of the options issued during the period was estimated using the Black Scholes option pricing model with the following weighted average inputs:

For the six months ended June 30	2014	2013
Fair value at grant date	\$ 0.11	\$ 0.07
Exercise price	\$ 0.24	\$ 0.18
Share price	\$ 0.24	\$ 0.18
Expected volatility	83.36%	81.18%
Expected option life	2.27 years	1.42 years
Dividends	0.0%	0.0%
Risk-free interest rate	1.10%	1.01%

Expected volatility is based on historical volatility and average weekly stock prices were used to calculate volatility. Management believes that the annualized weekly average of volatility is the best measure of expected volatility. A weighted average forfeiture rate of 6.03% (2013 – 6.48%) is used when recording stock based compensation.

(b) Share Purchase Warrants

The following table summarizes information about warrant transactions:

	Number of warrants	Weighted average exercise price \$

(b) Per share amounts:

Basic loss per share amounts has been calculated by dividing the loss for the year attributable to the shareholders of the Company by the weighted average number of common shares outstanding. Stock options and share purchase warrants were excluded from the calculation. The basic and diluted loss per share is the same as there are no dilutive effects on losses. The following table summarizes the common shares used in calculating basic and diluted net loss per common share:

NOTE 19 – SEASONALITY OF OPERATIONS

There are factors causing quarterly variances that may not be reflective of the Company's future performance. These include, but are not limited to weather conditions, oil and gas production, drilling activities which are affected by oil and natural gas commodity prices, global economic environment, as well as unexpected production curtailment caused by activities such as plant shutdown work. As the Company has operations in the United States, the consolidated financial results may vary between periods due to the effect of foreign exchange fluctuations in translating the expenses of its operations in the United States to Canadian dollars. As a result, quarterly operating results should not be relied upon as any indication of results for any future period.

NOTE 20 – SUBSEQUENT EVENT

On July 3, 2014, the Company closed the acquisition of an additional 24% working interest in the Drake/Woodrush oilfield in Northeastern B.C. to increase its working interest to 99%. As consideration for the purchase, the Company issued 9,600,000 common shares at a price of \$0.202 per share for \$1,939,000. A company controlled by the CEO of the Company (“HEC”) has a 5% working interest in the Drake/Woodrush property and the CEO abstained from voting when the Company’s Audit Committee and the Board of Directors approved the transaction on June 4, 2014.

On July 14, 2014, the Company obtained the regulatory approval for the acquisition and the issuance of the shares from the Toronto Stock Exchange.
